

# Check PRTs of molbloc

- Check the resistance of the two PRTs inside the molbloc

Pin Description

13 PRT1+

6 PRT1-

7 PRT2+

14 PRT2-

Ohms Nominal Temperature

100 Ohm: 0.00°C / 32F

107 Ohm: 18°C / 64F

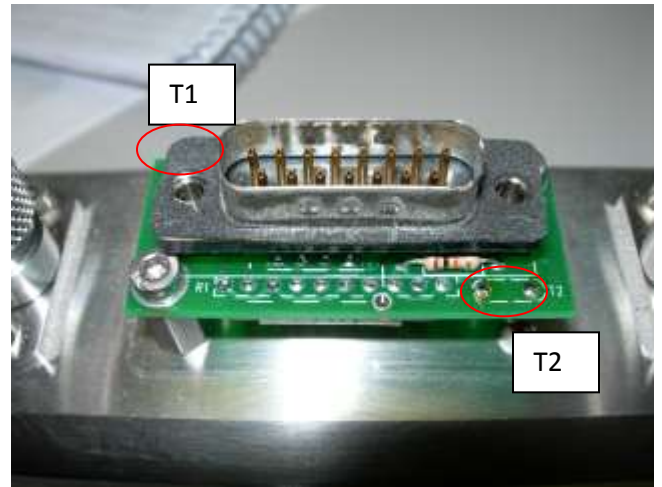

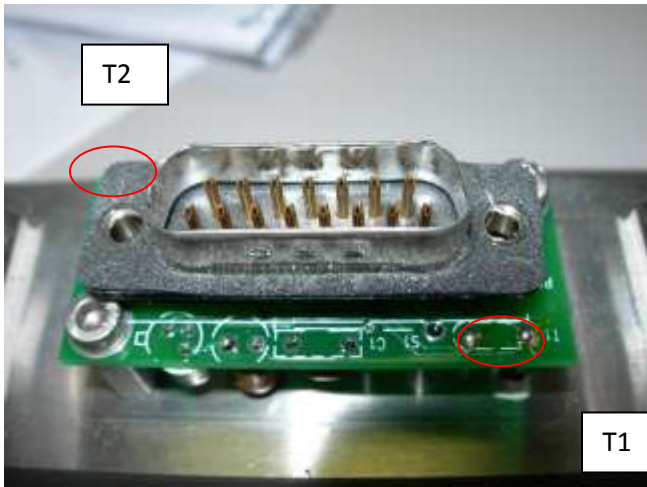

110 Ohm: 25.67°C / 78.2F

115 m: 38.50°C / 101.3F

- To check at the circuit board and inspect PRT solder connections, the molbloc cover needs to be removed. Remove both screws and the plastic cap.

- T1 is on blue side of molbloc. T2 is on red side.

- This is very rarely an issue but the solder should ideally have a profile as shown in "B" below rather than "A".
