To Our Valued Customers,

Notice of Extended Service Support End Dates for Discontinued Products

As part of our commitment to supporting you and helping you plan with confidence, we would like to share upcoming milestones related to extended service support for discontinued calibrators and instruments. Fluke Corporation’s standard practice is to continue providing service support for up to five years after a product is discontinued, allowing customers ample time to plan for ongoing service needs and potential replacements.

As these extended support periods conclude, the availability of certain services and repair parts may become limited. Our goal in sharing this information is to give you early visibility so you can make informed decisions and avoid any unexpected disruptions.

Below is a list of the affected models along with their respective end dates for extended service support and suggested replacements.
